ABSTRACT

Part of the Higher Education General Information Survey is the Current Inventory of College and University Physical Facilities Survey. Highlights of the 1970 survey include: (1) In the fall of 1970, institutions of higher education reported a gross floor area of more than 1.7 billion square feet. About two-thirds of the gross area was classified as assignable. (2) Year-to-year increases in floor area were somewhat smaller in 1970 than in the preceding year. (3) Residential facilities ranked first among all facilities classifications, with about 31 percent of the assignable square feet. Laboratories ranked second, with about 14 percent. Only about 8 percent of all assignable space was reported as classroom facilities. (4) Institutions of higher education reported total capacity of more than 1.9 million in student residence halls and dormitories. The overall occupancy rate was more than 90 percent. (Author/Pg)

HIGHLIGHTS

In fall 1970, institutions of higher education reported a gross floor area of more than 1.7 billion square feet. About two-thirds (1.2 billion square feet) of this gross area was classified as assignable.

Year-to-year increases in floor area were somewhat smaller in 1970 than in the preceding year. From 1969 to 1970, gross area increased by about 6 percent, compared with about 11 percent from 1968 to 1969. Assignable area increased by only 3.5 percent from fall 1969 to fall 1970, compared with about 10 percent in the preceding year.

Residential facilities ranked first among all facilities classifications, with about 31 percent of the assignable square feet. Laboratories ranked second, with about 14 percent. Only about 8 percent of all assignable space was reported as classroom facilities.

Institutions of higher education reported a total design capacity of more than 1.9 million in student residence halls and dormitories. The overall occupancy rate was more than 90 percent.

FOREWORD

The current Inventory of College and University Physical Facilities has been developed as part of the Higher Education General Information Survey (HEGIS), conducted annually by the National Center for Educational Statistics of the U.S. Office of Education. This year, for the first time, all operations of the survey, from the collection of the initial reports through the editing process to the preparation of final computer tape, were carried out under contract with Higher Education Facilities Services, Inc. (HEFS), a corporate subsidiary of the Association of Executive Directors of the State Higher Education Facilities Commission.

This fall 1970 inventory used the terminology and definitions set forth in the *Higher Education Facilities Classification and Inventory Procedures Manual*, published in 1968. The survey and this report are considerably more extensive than previous efforts in this series, including for the first time categorizations of space by subject field. As might be expected, the institutions of higher education encountered greater difficulty in responding accurately to this portion of the survey than to the parts with which they had previous experience. This was revealed by an HEFS field audit of 10 percent of the institutions in each State, with larger percents for certain States with the smaller number of institutions. These audits revealed that institutional recordkeeping and data retrieval sophistication were not generally adequate to the requests made upon the institutions for physical facilities data by subject field. Although these data are the best that have been gathered nationally, their adequacy varies widely from State to State, and they will not be generally adequate for detailed planning.

We wish to thank the State coordinating commissions, the State facilities commissions, and particularly the more than 2,000 college administrators who supplied the data for this survey.

Theodore H. Drews, *Chief*
Higher Education Surveys Branch

INTRODUCTION

In the part of the fifth annual Higher Education General Information Survey (HEGIS) covered in this report, institutions were asked to provide detailed information on floor space in their buildings as of September 30, 1970. The items in the survey questionnaire were based upon definitions in the *Higher Education Facilities Classification and Inventory Procedures Manual*.¹ A reproduction of the questionnaire is included as appendix III of this report.

Coverage

The 1969 survey of facilities was the first to make full use, without modification, of the tables in the Manual, classifying space by type of room, facilities classification, and organizational unit (sample report forms 1 and 2 of the Manual). The 1970 questionnaire differs from that for 1969 by the addition of three parts (C, D, and F). Part C requested area in square feet by subject field in four organizational units, part D asked for area by field in selected facilities classifications, and part F sought information on capacity and occupancy of residential accommodations, including dining hall seating capacity and space used to provide complete food services.

The principal contents of the questionnaire used in HEGIS facilities surveys from 1968 through 1971 may be summarized as follows:

Principal contents	Year of the inventory			
	Fall 1968	Fall 1969	Fall 1970	Fall 1971
Facilities classification	x	x	x	x
All types of rooms	x	x	x	x
Organizational units	x	x	x	x
Gross and assignable areas ...	x	x	x	x
Selected types of rooms	x	-	-	-
Subject fields (partially by groupings)	x	-	-	-
All subject fields	-	-	x	-
Institutionally owned or operated housing	-	-	x	-

¹U.S. Department of Health, Education, and Welfare, Office of Education (OE-51016). U.S. Government Printing Office, 1968. 102 p. Hereafter referred to as "the Manual."

The data from the aforementioned surveys, and as used in this publication, were reported in assignable square feet unless otherwise indicated. The data for institutionally owned or operated housing (fall 1970 only) were reported in terms of intended capacity and actual use. (The 1971 data, not shown in this report, appear in report number (OE) 73-11401; see inside back cover.)

The 1970 survey also differed from its two predecessors in the HEGIS series in the methodology employed after the questionnaire had been distributed. This methodology, designed to encourage and expedite responses while improving the quality of data, is discussed in considerable detail in appendix I.

Guides to Use of Data

Organization and content of the tables:

To help the user find and use the desired data in this report, a guide to the organization and general content of the basic tables appears on page 13, and a detailed subject-matter index to the summary and basic data tables appears at the end of the report.

In using this report, several basic space terms, and their interrelationships, should be kept in mind. These terms are:

Gross area:

The sum of the floor areas included within the outside faces of exterior walls for all stories or areas which have floor surfaces.

Assignable area: The sum of all areas on all floors of a building assigned to, or available for assignment to, an occupant, including every type of space functionally usable by an occupant, except custodial, circulation, mechanical, and construction spaces.

Assigned area: Assignable area in use.

Unassigned area: Assignable area not in use.

Nonassignable area: Gross area minus assignable; nonassignable area includes custodial, circulation, mechanical, and construction spaces.

SUMMARY OF PRINCIPAL FINDINGS

Overall Trends in Inventory Data for 1968, 1969, and 1970

The gross area of physical facilities in fall 1970 was substantially more than 1.7 billion square feet (table A), an increase of almost 96 million square feet (about 5.8 percent) over the gross area for 1969, which in turn had increased more than 167 million square feet (about 11.2 percent) over the area for fall 1968. Of the 1970 gross area, almost 1.2 billion square feet (about 70 percent) were assignable, an increase of about 40 million square feet (3.5 percent) over 1969; the 1969 figure was about 105 million higher (10.2 percent) than that for 1968.

Public institutions accounted for about 60 percent of the assignable area for fall 1968, 58 percent for fall 1969, and 61 percent for fall 1970. In 1970, as in 1968, public institutions enrolled more than 73 percent of the full-time-equivalent students in higher education.

The summary data for gross and assignable areas are shown in table A. More detailed data for fall 1970 only are shown in basic data tables 1 and 2, by institutional control level, enrollment size, and State or other area.

Trends in Distribution of Assignable Area by Facilities Classification

Table B shows assignable area for each facilities classification¹—in each of the three years for which comparable data were available. Residential facilities ranked first among all classifications, with about 31 percent of the assignable area in each of the years. Laboratories accounted for the next largest amount, with around 14 per-

¹A group of interrelated types of rooms serving a "common purpose"; for example, "study facilities," which consists of (types of rooms) study rooms, stacks, open-stack reading rooms, library rooms, and study facilities services.

†Includes service areas.

cent each year. In 1970 and 1969, office facilities ranked third and general-use facilities fourth; in 1968, the order of these two was reversed. Assigned area as a percent of assignable area varied relatively little from year to year, with about 98 percent assigned each year. Basic data table 3 shows more detail for fall 1970 only.

Table B also summarizes year-to-year changes in the distributions of assignable area for each facilities classification. Comparisons of 1970 and 1969 data show changes ranging from a decrease of 0.3 percent for special-use facilities to a gain of more than 11 percent for medical care. Classroom space increased by less than 3 percent for the year. Changes from 1968 to 1969 ranged from a decline of nearly 6 percent for general-use facilities to a gain of more than 17 percent for supporting facilities.

Table C compares separate data for public and private institutions with respect to the distributions of assignable area by facilities classification, whereas table B shows public and private data combined. Privately controlled institutions reported a noticeably higher percent as residential—about 34 to 36 percent for each of the three years—as compared with about 28 percent for public institutions. Among the nonresidential classifications, the largest percentage was for laboratory space; public institutions reported

about 16 to 17 percent of space in this category for each year, compared with about 10 or 11 percent for private institutions. More detailed data for fall 1970 are shown in tables 3A through 3F.

Distributions of assigned area (rather than assignable, as in table C) for each of the three compared years are summarized in table D. In this table, institutions are classified by both level and control. The percentages of assigned area reported for the various facilities classifications do not vary greatly among the three years for a given category of institutional level and control.

Trends in Distribution of Assigned Area by Organizational Unit

Table E shows distributions of the 1.14 billion square feet of area in fall 1970 assigned to and in use by selected organizational units (excluding noninstitutional agencies). For comparison, data are also shown for 1969, when the total assigned area amounted to about 1.10 billion square feet. Since universe estimates by organizational unit were not developed for the 1968 survey, that year's data cannot be included in this table.

As the table shows, organizational units concerned with auxiliary services (such as residential and general use) accounted for more than 42 percent of the space in use during both years, with

-Less than 0.05 percent.

‡From table C, fall 1969 report.

data for public and private institutions combined. However, the percent used by auxiliary units was noticeably higher for private than for public institutions—as might be expected from the previously noted findings on residential room types. Excluding the auxiliary services and the general administration and institutional services, the remaining five organizational units in table E may be considered “academic facilities.” The sum

of their percents (47.9 percent), with the exclusions, may then be considered the total area used for “academic facilities.” The sum of the percents for all organizational units except auxiliary services was 57.6 percent of the total assigned area used in fall 1970.

Additional details are shown in basic data tables 4 through 4F. It should be noted, however, that the percentage distributions differ somewhat,

mainly because those in table E exclude noninstitutional agencies, whereas those in tables 4-4F include them.

It should also be noted that the data shown in tables E and 4 through 4F differ somewhat from the data in tables D and 3 through 3F, because they are drawn from different reporting bases. The table 3 series, for example, shows assignable areas that were assigned room type classifications (part A of the questionnaire). But the table 4 series accounts for areas as reported assigned to organizational units (part B of the questionnaire). Their relationships, for the overall totals (tables 3 and 4), are shown in the following:

Assignment status	Room classification (table 3)	Organizational unit (table 4)
Assignable total ..	1,171,040,659	(1,171,040,659)
Assigned room classification ..	1,143,793,308	
Unassigned	27,247,351	
Not assigned to organizational unit for use		(1,318,236)
Total unassigned for use		28,565,587
Assigned to organizational unit for use		1,142,475,072
Not in use there		(3,490,349)
In use by organizational unit		1,138,984,723

Distribution of Assigned Area by Subject Field

Summary table F was developed from basic data tables 5 through 5F for convenience in com-

paring the distributions in percent of assigned area by subject field for institutions of higher education classified by control and level. In this survey, the subject field classification applied only to areas assigned to departments of instruction and research, organized activity units, organized research units, and public service units, amounting to about 469 million square feet, or about two-fifths of the total assigned area. These organizational units correspond to the "total instructional" category in tables 5 through 5F and "academic facilities" in the preceding section.

According to the Manual,² classrooms and classroom service rooms would normally be included in the "general or unclassified" category of subject field, irrespective of departmental assignment. It is not surprising, therefore, to find that this category accounted for the greatest percent of assigned area in all institutional groups in table F, ranging from almost 19 percent at public universities to a little over 40 percent in private 2-year institutions. For public universities, the second highest percent was for agricultural sciences; for private universities, physical sciences. Space specifically assigned to physical education ranked second for the other four categories of institutions (other 4-year and 2-year, for both public and private control).

Since the 1970 survey was the first to request data according to subject-field classifications specified in the Manual, emerging and historical trend comparisons are not possible. As noted in

²See footnote 1 on p. 1.

TABLE E.—Percent distributions and comparisons of fall 1970 and 1969 area in use in buildings of institutions of higher education, by institutional control and selected organizational units: Aggregate United States

#Mathematical, computer, physical, and engineering.

the Foreword of this report, a number of institutions reported that the classification of space by subject field was considerably more difficult than were other portions of the survey. Accordingly, results shown in tables 5-5F and in summary tables F and G should be interpreted with due caution. A brief discussion of the procedures followed and cautions to be observed in use of the subject-field data for detailed analysis is included in Appendix I, General Methodology.

Distribution of Assigned Area by Subject Field and Size of Institution

For convenience in comparing the percent distributions of assigned area for each subject field, by FTE (full-time-equivalent) enrollment size of institution, for selected organizational units, summary table G was extracted from basic data table 5. As stated hereinbefore, the subject-field classifications apply only to the areas assigned to the departments of instruction and research and the organized activity, organized research, and public service units.

As one would expect, two subject fields—general and unclassified, and physical education, combined—accounted for a large portion of the assigned area, ranging from 26 percent for institutions having more than 25,000 FTE students to a little more than 47 percent for the under-500-student size.

Table G shows the percent of assigned area for 45 subject fields in each of 7 institutional enrollment size groups. A further consolidation of the details from basic data table 5 and summary table G is presented in table H. It is noteworthy that, of the 315 items of distribution of subject fields and institutional sizes, 202 (64 percent) involved

less than 1 percent of their associated assigned areas. Twenty-two were for less than 0.05 percent. Sixty-nine (61 percent) of the residual 113 entries had amounts ranging from 1.1 percent to 5.0 percent.

Basic tables 6-6F show additional detail by room type.

Capacity and Occupancy of Housing Accommodations

Table I summarizes information from basic data table 7 on design (intended or planned) capacity and actual occupancy of college residential accommodations *for students*. The average occupancy "rate" for student sleeping rooms was about 94 percent for public institutions and a little more than 92 percent for private. The lowest such utilization rate (about 86 percent) was for private 2-year colleges.

Table J (also extracted from basic data table 7) provides data on food service in college and university residence halls. Seating capacity for food service totaled 620,031 (383,324 for public and 236,707 for private). The average area per unit of seating capacity was 27 square feet for public institutions and 25 square feet for private.

Table K presents data for one- and multi-family dwellings. Occupancy greater than intended capacity (tables K and 7) indicates some form of sharing or subdivision of units. The rates of occupancy for family units ranged from a low of about 98 percent for private 2-year colleges to a high of 101 percent for private universities.

Additional details, distributed by region and State or other area of the United States, are shown in basic data table 8.

TABLE G.—Percent distributions and comparisons of fall 1970 assigned area in buildings of institutions of higher education for each subject field in selected organizational units,* by FTE (full-time-equivalent) enrollment size of institution: Aggregate United States

*Assigned, in square feet, from table 7 of this report.

ORGANIZATION OF THE BASIC DATA TABLES

The data selected for reporting are presented in 32 basic tables (8 "master" tables, of which 4 have related subseries), designed to provide maximum information for further analysis in areas of the user's concern or interest. Almost all of the data are shown by institutional control (public and private), institutional level (universities, etc.), and enrollment size group¹ to provide convenient bases for making comparisons and various summaries.

These 32 tables are based on data for the entire higher education universe. Since the Office of Education received from the collecting agent (see first paragraph of Introduction) information on all institutions, no statistical imputations were necessary (see appendix A). The basic data tables fall into six general groupings. They are:

- 1) Tables 1 and 2 report summary information on gross and assignable areas by institutional control, level, and enrollment size (table 1) and by region and State or other area (table 2). These tables also show the amount of assignable area that is *not* owned by the institution (i.e., rented or shared).
- 2) Tables 3 through 3F report data for type of room or facilities classification and for institutional enrollment size.
- 3) Tables 4 through 4F report the types of rooms or facilities classifications as percent of assigned area in use and as percent of nonresidential areas in use.
- 4) Tables 5 through 5F report assigned areas per FTE student, by selected organizational unit and subject field and by institutional enrollment size.

5) Tables 6 through 6F report assigned area per FTE student in selected organizational units, by enrollment size of institution and by selected room-type and subject-field classifications.

6) Tables 7 and 8 present data on design capacity, actual occupancy, and assigned area of institutionally owned or operated housing and related food service.

In addition, 11 summary tables are included in the text of this report. Whenever possible, these text tables provide comparisons of 1970 data with corresponding figures from the 1969 and 1968 surveys. All data shown in the historical tables apply to the entire higher education universe for the year under consideration. As noted earlier, in the 1970 survey OE received complete data for all institutions so that no imputations were necessary. In 1968 and 1969, however, there were a number of nonrespondents² so that imputations were needed in order to develop complete universe estimates.

For the convenience of the reader as well as for ease in preparing the statistical tabulations, totals have not been rounded but are given as they were obtained by the addition of amounts for individual institutions. Generally, fractional computations have been rounded to the nearest 10th of 1 percent. Amounts of 0.05 percent or less have been dropped and a symbol entered, with appropriate footnote explanation. These presentations in no way imply that totals and subtotals are accurate to the last digit. Similarly, presentation of percents to the nearest 10th does not imply that level of accuracy.

¹For the tables of this report, institutional size is based on FTE (full-time-equivalent) student enrollment computed as the headcount of full-time students plus one-third of the headcount of part-time students.

²In the 1968 survey, responses were received from 82 percent of the institutions in the universe; in 1969, from 88 percent. The responding institutions accounted for about 90 percent of the students enrolled in 1968 and about 93 percent in 1969.

BASIC DATA TABLES

NOTES

Unless otherwise indicated, these symbols in the tables should be interpreted as follows:

- Not reported, not applicable, or less than 0.5 square feet, as appropriate.
- Less than 0.05 percent.

*Selected organizational units only: departments, of instruction and research, organized activity units, organized research units, and public service units.

Percent details may not add to totals shown, because of rounding and accumulation of small amounts not shown (footnote --).

TABLE 1.--ASSIGNABLE, NONASSIGNABLE, AND NONOWNED PORTION OF ASSIGNABLE AREA IN BUILDINGS OF INSTITUTIONS OF HIGHER EDUCATION, BY INSTITUTIONAL CONTROL, LEVEL, AND FULL-TIME-EQUIVALENT (FTE) ENROLLMENT SIZE: AGGREGATE UNITED STATES, SEPTEMBER 30, 1970

* PERCENT DISTRIBUTIONS ARE PERCENTS OF ALL THE ASSIGNED AREAS IN USE IN THE CATEGORY INDICATED, TOTAL OR NONRESIDENTIAL, FOR ALL INSTITUTIONS OR THE INDIVIDUAL SIZE GROUPS. FOR EXAMPLE, THE DIVISOR FOR COLUMN 3 COMPUTATIONS IS THE SUM OF THE AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS: INSTRUCTIONAL, LIBRARY, ADMINISTRATION, AUXILIARY SERVICES, AND NON-INSTITUTIONAL. SIMILARLY, THE DIVISOR FOR COLUMN 4 IS THE SUM OF NONRESIDENTIAL AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS.

HIGHER EDUCATION, BY FULL-TIME-EQUIVALENT ENROLLMENT SIZE AND BY ORGANIZATIONAL UNIT, FACILITIES CLASSIFICATION, AND TYPE OF ROOM:
UNITED STATES, SEPTEMBER 10, 1970

* PERCENT DISTRIBUTIONS ARE PERCENTS OF ALL THE ASSIGNED AREAS IN USE IN THE CATEGORY INDICATED, TOTAL OR NONRESIDENTIAL, FOR ALL INSTITUTIONS OR THE INDIVIDUAL SIZE GROUPS. FOR EXAMPLE, THE DIVISOR FOR COLUMN 3 COMPUTATIONS IS THE SUM OF THE AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS: INSTRUCTIONAL, LIBRARY, ADMINISTRATION, AUXILIARY SERVICES, AND NON-INSTITUTIONAL. SIMILARLY, THE DIVISOR FOR COLUMN 4 IS THE SUM OF NONRESIDENTIAL AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS.

HIGHER EDUCATION, BY FULL-TIME-EQUIVALENT ENROLLMENT SIZE AND BY ORGANIZATIONAL UNIT, FACILITIES CLASSIFICATION, AND TYPE OF ROOM:
UNITED STATES, SEPTEMBER 30, 1970

* PERCENT DISTRIBUTIONS ARE PERCENTS OF ALL THE ASSIGNED AREAS IN USE IN THE CATEGORY INDICATED, TOTAL OR NONRESIDENTIAL, FOR ALL INSTITUTIONS OR THE INDIVIDUAL SIZE GROUPS. FOR EXAMPLE, THE DIVISOR FOR COLUMN 3 COMPUTATIONS IS THE SUM OF THE AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS: INSTRUCTIONAL, LIBRARY, ADMINISTRATION, AUXILIARY SERVICES, AND NON-INSTITUTIONAL. SIMILARLY, THE DIVISOR FOR COLUMN 4 IS THE SUM OF NONRESIDENTIAL AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS.

HIGHER EDUCATION, BY FULL-TIME EQUIVALENT ENROLLMENT SIZE AND BY ORGANIZATIONAL UNIT, FACILITIES CLASSIFICATION, AND TYPE OF ROOM

* PERCENT DISTRIBUTIONS ARE PERCENTS OF ALL THE ASSIGNED AREAS IN USE IN THE CATEGORY INDICATED, TOTAL OR NONRESIDENTIAL, FOR ALL INSTITUTIONS OR THE INDIVIDUAL SIZE GROUPS. FOR EXAMPLE, THE DIVISOR FOR COLUMN 3 COMPUTATIONS IS THE SUM OF THE AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS: INSTRUCTIONAL, LIBRARY, ADMINISTRATION, AUXILIARY SERVICES, AND NON-INSTITUTIONAL. SIMILARLY, THE DIVISOR FOR COLUMN 4 IS THE SUM OF NONRESIDENTIAL AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS.

HIGHER EDUCATION, BY FULL-TIME-EQUIVALENT ENROLLMENT SIZE AND BY ORGANIZATIONAL UNIT, FACILITIES CLASSIFICATION, AND TYPE OF ROOM

* PERCENT DISTRIBUTIONS ARE PERCENTS OF ALL THE ASSIGNED AREAS IN USE IN THE CATEGORY INDICATED, TOTAL OR NONRESIDENTIAL, FOR ALL INSTITUTIONS OR THE INDIVIDUAL SIZE GROUPS. FOR EXAMPLE, THE DIVISOR FOR COLUMN 3 COMPUTATIONS IS THE SUM OF THE AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS: INSTRUCTIONAL, LIBRARY, ADMINISTRATION, AUXILIARY SERVICES, AND NON-INSTITUTIONAL. SIMILARLY, THE DIVISOR FOR COLUMN 4 IS THE SUM OF NONRESIDENTIAL AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS.

HIGHER EDUCATION, BY FULL-TIME-EQUIVALENT ENROLLMENT SIZE AND BY ORGANIZATIONAL UNIT, FACILITIES CLASSIFICATION, AND TYPE OF LAND

* PERCENT DISTRIBUTIONS ARE PERCENTS OF ALL THE ASSIGNED AREAS IN USE IN THE CATEGORY INDICATED, TOTAL OR NONRESIDENTIAL, FOR ALL INSTITUTIONS OR THE INDIVIDUAL SIZE GROUPS. FOR EXAMPLE, THE DIVISOR FOR COLUMN 3 COMPUTATIONS IS THE SUM OF THE AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS: INSTRUCTIONAL, LIBRARY, ADMINISTRATION, AUXILIARY SERVICES, AND NON-INSTITUTIONAL. SIMILARLY, THE DIVISOR FOR COLUMN 4 IS THE SUM OF NONRESIDENTIAL AREAS IN USE BY ALL OF THE ORGANIZATIONAL

HIGHER EDUCATION, BY FULL-TIME-EQUIVALENT ENROLLMENT SIZE AND BY ORGANIZATIONAL UNIT, FACILITIES CLASSIFICATION, AND TYPE OF ROOM:
UNITED STATES, SEPTEMBER 30, 1970

SQUARE FEET)

* PERCENT DISTRIBUTIONS ARE PERCENTS OF ALL THE ASSIGNED AREAS IN USE IN THE CATEGORY INDICATED, TOTAL OR NONRESIDENTIAL, FOR ALL INSTITUTIONS OR THE INDIVIDUAL SIZE GROUPS. FOR EXAMPLE, THE DIVISOR FOR COLUMN 3 COMPUTATIONS IS THE SUM OF THE AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS: INSTRUCTIONAL, LIBRARY, ADMINISTRATION, AUXILIARY SERVICES, AND NON-INSTITUTIONAL. SIMILARLY, THE DIVISOR FOR COLUMN 4 IS THE SUM OF NONRESIDENTIAL AREAS IN USE BY ALL OF THE ORGANIZATIONAL UNITS.

HIGHER EDUCATION, BY FULL-TIME-EQUIVALENT ENROLLMENT SIZE AND BY ORGANIZATIONAL UNIT, FACILITIES CLASSIFICATION, AND TYPE OF ROOM:
UNITED STATES, SEPTEMBER 30, 1970

IV. Index for Summary and Basic Data Tables

Appendix I

GENERAL METHODOLOGY

The survey questionnaire, "Inventory of College and University Physical Facilities: September 30, 1970," was distributed by the U.S. Office of Education (OE) as part of the Higher Education General Information Survey (HEGIS) package for 1970-71. The primary source for the list of institutions included in HEGIS was the *Education Directory, 1969-70, Higher Education* (OE-50000-71), with such changes in the fall of 1970 as were known by OE.

The survey universe for 1970-71 consisted of 2,565 institutions of higher education, accounting for a total of 2,848 components (main campuses, branch campuses, specialized campuses, and extension centers), from which separate survey report forms were requested. Summary tabulations of numbers of institutions, campuses, and full-time-equivalent student enrollments by State are reported in appendix II, table II-A, and by institutional control and level in appendix table II-B. The survey universe does not necessarily coincide with State records, such as those compiled by agencies or commissions which administer facilities acquisition programs.

Institutions of higher education included in this report are classified as universities, other 4-year, and 2-year institutions. The other 4-year institutions are those that offer programs extending at least 4 years beyond the high school. They comprise all institutions that grant bachelor's or higher degrees or some other recognition equivalent to such degree; e.g., ecclesiastical recognition in theological institutions. They may also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion, such as a certificate or diploma. Universities are those institutions that give considerable stress to graduate instruction and have at least two professional schools that are not exclusively technological.

Reports for the fall 1970 physical facilities survey were collected at the State level by the office having administrative responsibility for the Higher Education Facilities Act (HEFA) of 1963

and subsequent amendments. The principal administrator has frequently been referred to as the "State Executive Director for HEFA." These directors established Higher Education Facilities Services (HEFS), Inc., and contracted with the Office of Education for the collection and editing of the data for NCES at the national level. At the conclusion of this effort, HEFS provided NCES with a "clean tape" record for all institutions in the survey universe.

The contractual agreement with HEFS indicated that the primary responsibility for the inventory and its quality rested in the institutional representative assigned to the project. Communications from HEFS to the State commissions emphasized the leadership and supervisory role of the commissions, including consultative services to the colleges, followup on slow respondents, and review edits. Similar arrangements prevailed at the State level with respect to HEFS's responsibility to OE.

As an aid to the editing process, OE contracted with Survey Management Systems (SMS) for the preparation of "Edit Manual I—the Completely Manual Procedure," and "Manual II—the Computer Aided Procedures." A machine-edit program, also provided by SMS, was intended for use by institutional participants as well as the State commissions. Each machine operation had its own unique procedures for correcting errors. In one reasonably foolproof method, the machine room returned the entire deck of data cards to the respondent, with a printout of error messages. The cards were corrected and sent back to HEFS.

The OE contract also included an edit by HEFS prior to submittal of data to NCES. A third edit was to be done by NCES prior to tabular operations. Thus data "purification" was specified for four major points—(1) at the institution, (2) at the State commission, (3) at HEFS, and (4) at NCES.

As a further aid to the executive directors of the State commissions, "HEFS Letters" were prepared upon recognition of a problem needing

clarification or requiring supplemental instructions.

The OE contract with HEFS required field audits of 10 percent of the institutions in each State, with larger percents for certain States with the greater number of institutions. Among the purposes of these audits were:

- To discover systematic misinterpretation of data by institutions in order to permit adjustment of the data and to increase knowledge of the manner in which institutions keep their records and respond to surveys.

- To provide some basis for increasing the quality of institutional responses in a State and to assist the State commissions in deriving an evaluation of the statistical quality of data for submittal to OE.

These audits revealed that institutional record-keeping and data retrieval sophistication was not completely adequate to the requests made upon the institutions for physical facilities data by subject field. Although these data are the best that have been gathered nationally, they will not be adequate for detailed planning.

APPENDIX II

APPENDIX III, THE QUESTIONNAIRE

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE OFFICE OF EDUCATION WASHINGTON, D.C. 20202 HIGHER EDUCATION GENERAL INFORMATION SURVEY INVENTORY OF COLLEGE AND UNIVERSITY PHYSICAL FACILITIES (September 30, 1970)	Read instructions on page 6 before completing this form.	BUDGET BUREAU NO. 51-R0473 APPROVAL EXPIRES: 6/30/72 1. INSTITUTION CODE NUMBER DUE DATE November 30, 1970
--	--	--

NOTE: Complete a form for MAIN CAMPUS and a separate form for each BRANCH CAMPUS. For MAIN CAMPUS report, complete Items 1 and 2. For BRANCH CAMPUS report, complete Items 1, 2, 3, and 4.

2. NAME OF INSTITUTION AND ADDRESS (Include ZIP Code)	3. BRANCH NAME AND ADDRESS (Include ZIP Code)
	4. BRANCH CODE NUMBER
5. NAME AND TITLE OF RESPONDENT	6. TELEPHONE NUMBER OF RESPONDENT (Area code, local number, and extension)

PART A - TOTAL CAMPUS, BY TYPE OF ROOM

TYPE OF ROOM	LINE NO.	NET ASSIGNABLE SQUARE FEET	TYPE OF ROOM	LINE NO.	NET ASSIGNABLE SQUARE FEET
100 CLASSROOM FACILITIES - TOTAL (Sum of Lines 2 and 3)	1		400 STUDY FACILITIES (Continued)		
110 CLASSROOM	2		440 LIBRARY PROCESSING ROOM	22	
115 CLASSROOM SERVICE	3		455 STUDY FACILITIES SERVICE	23	
200 LABORATORY FACILITIES - TOTAL (Sum of Lines 5 thru 12)	4		500 SPECIAL-USE FACILITIES - TOTAL (Service rooms included) (Sum of Lines 25 thru 31)	24	
210 CLASS LABORATORY	5		510 ARMORY FACILITIES	25	
215 CLASS LABORATORY SERVICE	6		520 ATHLETIC-PHYSICAL EDUCATION FACILITIES	26	
220 SPECIAL CLASS LABORATORY	7		530 AUDIOVISUAL, RADIO, TV FACILITIES	27	
225 SPECIAL CLASS LABORATORY SERVICE	8		540 CLINIC FACILITIES (Nonmedical)	28	
230 INDIVIDUAL STUDY LABORATORY	9		550 DEMONSTRATION FACILITIES	29	
235 INDIVIDUAL STUDY LABORATORY SERVICE	10		560 FIELD-SERVICE FACILITIES	30	
250 NONCLASS LABORATORY	11		590 OTHER SPECIAL-USE FACILITIES	31	
255 NONCLASS LABORATORY SERVICE	12		600 GENERAL-USE FACILITIES - TOTAL (Service rooms included) (Sum of Lines 33 thru 40)	32	
300 OFFICE FACILITIES - TOTAL (Sum of Lines 14 thru 17)	13		610 ASSEMBLY FACILITIES	33	
310 OFFICE	14		620 EXHIBITION FACILITIES	34	
315 OFFICE SERVICE	15		630 FOOD FACILITIES	35	
350 CONFERENCE ROOM	16		640 HEALTH FACILITIES (Student)	36	
355 CONFERENCE ROOM SERVICE	17		650 LOUNGE FACILITIES	37	
400 STUDY FACILITIES - TOTAL (Sum of Lines 19 thru 23)	18		660 MERCHANDISING FACILITIES	38	
410 STUDY ROOM	19		670 RECREATION FACILITIES	39	
420 STACK	20		690 OTHER GENERAL-USE FACILITIES	40	
430 OPEN-STACK READING ROOM	21		(Continued on Page 2)		

NAME OF INSTITUTION

1. INSTITUTION CODE NUMBER

PART A - TOTAL CAMPUS, BY TYPE OF ROOM (Continued)

TYPE OF ROOM	LINE NO.	NET ASSIGNABLE SQUARE FEET	TYPE OF ROOM	LINE NO.	NET ASSIGNABLE SQUARE FEET
700 SUPPORTING FACILITIES - TOTAL (Service rooms included) (Sum of Lines 42 thru 48)	41		900 RESIDENTIAL FACILITIES - TOTAL (Sum of Lines 57 thru 61)	56	
710 DATA PROCESSING, COMPUTER FACILITIES	42		910 NON-DORMITORY RESIDENCE FOR SINGLE PERSONS	57	
720 SHOP FACILITIES	43		911 DORMITORY OR RESIDENCE HALL	58	
730 STORAGE FACILITIES	44		912 FOOD SERVICE IN RESIDENCE HALLS	59	
740 VEHICLE STORAGE	45		920 ONE-FAMILY DWELLINGS	60	
750 CENTRAL FOOD STORES	46		930 MULTIPLE-FAMILY DWELLINGS	61	
760 CENTRAL LAUNDRY	47		TOTAL FACILITIES IN USE (Sum of Lines 55 and 56)	62	
790 OTHER SUPPORTING FACILITIES	48				
800 MEDICAL CARE FACILITIES - TOTAL (Service rooms included) (Sum of Lines 50 thru 54)	49		080 UNASSIGNED FACILITIES - TOTAL (Sum of Lines 64 thru 66)	63	
810 HUMAN HOSPITAL--CLINIC FACILITIES	50		081 INACTIVE	64

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
WASHINGTON, D.C. 20202

HIGHER EDUCATION GENERAL INFORMATION SURVEY

INVENTORY OF COLLEGE AND UNIVERSITY
PHYSICAL FACILITIES

(September 30, 1970)

(OE FORM 2300-7)

INSTRUCTIONS AND DEFINITIONS

GENERAL

Data acquired in this survey will be published in listings by individual institutions.

1. The increasing demands for education, and the rapid growth of institutions of higher education, emphasize the needs for long-range planning at all levels of responsibility. Current decisions affect an institution far into the future, and it is believed that most colleges are now utilizing long-term projections as a management tool or guide in planning. An inventory of physical facilities is an inter-related part of an institution's long-range plans. These data, by institution, will be of use to the Office of Education in evaluating applications for grants and loans. They will also be used as an aid in overall projections regularly prepared by the Office of Education.
2. The inventory requests data for the entire institution by main campus, branches, extension centers, etc. The items and definitions used in this report on physical facilities are consistent with the *Higher Education Facilities Classification and Inventory Procedures Manual (OE-51016)*. It is requested that OE Form 2300-7, 3/70, be completed and returned to the U.S. Office of Education, National Center for Educational Statistics, 400 Maryland Avenue, SW., Washington, D. C. 20202, ATTENTION: Room 1130 - HEGIS.
3. As in last year's form (OE 2300-7, 3/69) PART A of this form collects assignable square feet by facilities category and type of room, and PART B, assignable square feet by organizational unit, facilities category, and selected types of rooms. In addition, PART C collects assignable square feet by organizational units 1000 through 4000 (*departments of instruction and research, organized activity units, organized research units, and public service units*) and selected subject fields. PART D collects assignable square feet assigned to organizational units 1000 through 4999 by selected facilities category, selected type of room, and selected subject field.
4. Please read the instructions and definitions. If you need clarification on any item, please write Dr. E. Eugene Higgins, U.S. Office of Education, National Center for Educational Statistics, 400 Maryland Avenue, SW., Washington, D.C. 20202. Dr. Higgins may be reached by telephone on (202) 962-7301.

SPECIFIC

1. A separate report should be prepared for the main campus, and each branch campus, extension center, etc., in operation as of September 30, 1970.
2. Identifying information should be placed in the spaces provided at the top of the form, always including the name of the parent institution.
3. Rented and/or shared facilities.--Include in detail form the rented and/or shared space in PARTS A, B, C, and D, then indicate, as provided for in PART E, the total number of rented and/or shared net assignable square feet of space that have been included in PARTS A, B, C, and D.
4. Entries of space information should be in square feet.
5. The nonassignable area added to total existing facilities area should equal the gross area. (*See Supplemental and Summary Information.*)
6. Please note that identical items in COLUMN (1) OF PART B, AND IN PART A (e.g., 110 Classroom) must have identical data entries.

DEFINITIONS

1. Refer to *Higher Education Facilities Classification and Inventory Procedures Manual (OE-51016)* for space definitions applicable to this survey. Two additional definitions follow.
2. **MAIN CAMPUS**--The land area and facilities used by an institution of higher education in its program of instruction, research, or service. In those institutions comprised of a main campus and one or more branch campuses, the main campus (*sometimes called the parent institution*) is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office is reported to be at a different location, the main campus is also the location of the central administrative office.
3. **BRANCH CAMPUS**--A campus of an institution of higher education which is organized on a relatively permanent basis (*i.e., has a relatively permanent administration*), which offers an organized program or programs of work of at least 2 years, and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus.

Appendix IV

INDEX FOR SUMMARY AND BASIC DATA TABLES

(Summary, numbers A-K; basic, numbers 1-8)

- Administration, 4-4F
- Administrative professions, F, G; 5-5F, 6-6F
- Agricultural sciences, F, G; 5-5F, 6-6F
- Agricultural technologies, F, G; 5-5F, 6-6F
- Alabama, 2, 8
- Alaska, 2, 8
- All other facilities, 4-4F
- Alteration/conversion area, 3-3F
- Apparel design/fabrication technologies, F, G; 5-5F, 6-6F
- Area per bed, I; 8
- Area per dwelling unit, K; 8
- Area per seat, J; 7, 8
- Arizona, 2, 8
- Arkansas, 2, 8
- Armory, 3-3F
- Assembly, 3-3F
- Assignable area, A-C; 1, 2, 3-3F
- Assigned, B-K; 3-3F, 4-4F, 5-5F, 6-6F
- Assigned area in use, E, I-K; 4-4F
- Athletic/physical education, 3-3F (see also Physical education)
- Audiovisual, 3-3F
- Auxiliary services, E; 4-4F
- Beds, I; 7, 8
- Biological sciences, F, G; 5-5F, 6-6F
- Business technologies, F, G; 5-5F, 6-6F
- California, 2, 8
- Canal Zone, 2, 8
- Central food stores, 3-3F
- Central laundry, 3-3F
- Charges, fall 1969 to fall 1970, B
- Charges, fall 1968 to fall 1969, B
- Class laboratory, 3-3F, 4-4F
- Class laboratory service, 3-3F, 4-4F
- Class laboratory/service, 6-6F
- Classroom facilities, B, C, D; 3-3F, 4-4F
- Classrooms, 3-3F, 4-4F
- Classroom service, 3-3F, 4-4F
- Clinic (nonmedical), 3-3F
- Colorado, 2, 8
- Computer sciences, F, G; 5-5F, 6-6F
- Conference room, 3-3F
- Conference room service, 3-3F
- Connecticut, 2, 8
- Construction technologies, F, G; 5-5F, 6-6F
- Control, institutional, A, C-K; 3A-3F, 4A-4F, 5A-5F, 6A-6F, 7 (see also Public and Nonpublic)
